

# Fronteiras da Transferência de Aprendizagem: uma revisão sistemática com enfoque meta-analítico

Fred Guth

fredguth@fredguth.com

Brasília, DF, Brazil

## RESUMO

A clear and well-documented  $\LaTeX$  document is presented as an article formatted for publication by ACM in a conference proceedings or journal publication. Based on the “acmart” document class, this article presents and explains many of the common variations, as well as many of the formatting elements an author may use in the preparation of the documentation of their work.

## CCS CONCEPTS

• Computing methodologies → Transfer learning.

## KEYWORDS

transferência de aprendizado, revisão sistemática, enfoque meta-analítico

## 1 INTRODUÇÃO

### 1.1 Contribuições

### 1.2 Visão Geral e Organização do Artigo

### 1.3 Trabalhos Relacionados

## 2 MÉTODO DE REVISÃO SISTEMÁTICA

### 2.1 O Enfoque Meta Analítico

### 2.2 Análise de Co-citações

### 2.3 Análise de Acoplamento Bibliográfico

### 2.4 Análise Textual

### 2.5 Sumarização

### 2.6 Revisão da Literatura

### 2.7 Transferência de Aprendizagem

### 2.8 Um breve histórico

### 2.9 Os Clássicos

### 2.10 A Fronteira

## 3 PROBLEMAS EM ABERTO

## 4 CONCLUSÃO

## 5 CITATIONS AND BIBLIOGRAPHIES

The use of  $\BibTeX$  for the preparation and formatting of one’s references is strongly recommended. Authors’ names should be complete — use full first names (“Donald E. Knuth”) not initials (“D. E. Knuth”) — and the salient identifying features of a reference should be included: title, year, volume, number, pages, article DOI, etc.

The bibliography is included in your source document with these two commands, placed just before the `\end{document}` command:

```
\bibliographystyle{ACM-Reference-Format}
\bibliography{bibfile}
```

where “bibfile” is the name, without the “.bib” suffix, of the  $\BibTeX$  file.

Citations and references are numbered by default. A small number of ACM publications have citations and references formatted in the “author year” style; for these exceptions, please include this command in the **preamble** (before “`\begin{document}`”) of your  $\LaTeX$  source:

```
\citestyle{acmauthoryear}
```

Some examples. A paginated journal article [2], an enumerated journal article [7], a reference to an entire issue [6], a monograph (whole book) [19], a monograph/whole book in a series (see 2a in spec. document) [13], a divisible-book such as an anthology or compilation [9] followed by the same example, however we only output the series if the volume number is given [10] (so Editor00a’s series should NOT be present since it has no vol. no.), a chapter in a divisible book [29], a chapter in a divisible book in a series [8], a multi-volume work as book [18], an article in a proceedings (of a conference, symposium, workshop for example) (paginated proceedings article) [3], a proceedings article with all possible elements [28], an example of an enumerated proceedings article [11], an informally published work [12], a doctoral dissertation [5], a master’s thesis: [4], an online document / world wide web resource [1, 23, 30], a video game (Case 1) [22] and (Case 2) [21] and [20] and (Case 3) a patent [27], work accepted for publication [24], ‘YYYYb’-test for prolific author [25] and [26]. Other cites might contain ‘duplicate’ DOI and URLs (some SIAM articles) [17]. Boris / Barbara Beeton: multi-volume works as books [15] and [14]. A couple of citations with DOIs: [16, 17]. Online citations: [30–32].
